

Cyclic Coarse Aggregate Production Technology Using the Aggregate Diameter Based Sorting & Sequential Feeding Equipment and Operating Speed Adjustable Cone Crusher

New Technology	Cyclic Coarse Aggregate Production Technology Using the Aggregate Diameter Based Sorting & Sequential Feeding Equipment and Operating Speed Adjustable Cone Crusher	Certificate	New Technology Certificate No. 507
Model Name	-	Application Part	Waste
Company	Natural Environment Co., Ltd.	Contact	Bang, Seong-wan
Homepage	-	Telephone	+82-61-432-7373
FAX	+82-61-432-4594	E-mail	ne21@hanmail.net
Address	188-24, Byeolmoe-ro, Seongjeon-myeon, Gangjin-gun, Jeollanam-do, Korea

1. Overview

- To put cyclic coarse aggregates under production respectively in 2 sets of Hoppers using the Aggregate Diameter Based Sorting & Sequential Feeding Equipment and Operating Speed Adjustable Cone Crusher, and feed to the Cone Crusher in order using the Sequential Feeding Equipment constituted of Hoppers and Automatic Closing & Opening Device.
- Cyclic aggregate production technology enhancing the quality by removing the cement paste effectively.

2. Characteristics

- Cyclic coarse aggregate production technology sorting the cyclic aggregates by diameter using the cone crusher installed with Sequential Feeding Equipment & Operation Speed Adjustable Device.
- Processing Capacity: 90ton/hour x 8hour

3. Application Area

- Issuance Category (Effective Period) : October 5th, 2016 ~ October 4th, 2021

4. Source

- New Excellent Technology (<http://www.koetv.or.kr>)
